

Paul Bedard

Vice President, Project Management Boston

Professional Experience

As Vice President, Project Management, Paul is responsible for the end-to-end success of commercial construction projects in Greater Boston. He works closely with clients to identify the objectives and key performance indicators for each initiative and oversees both high-level strategies and day-to-day coordination to deliver successful projects.

With a focus on healthcare and life sciences clients, Paul understands the challenges facing these organizations as well as the opportunities to maximize their real estate and differentiate themselves among competitors. In his nearly two decades of experience working in commercial real estate, Paul has developed exceptional collaboration and communication skills and a meticulous eye for detail.

Education

Paul received a Bachelor of Applied Science in architecture and engineering from New England Institute of Technology in 2005.

Affiliations

Paul is a member of both the American Society for Health Care Engineering (ASHE) and the New England Healthcare Engineering Society (NEHES).

Personal Interests

Outside of the office, Paul enjoys time with his wife and two kids, golfing, and the occasional impromptu flight to Florida.
